

Ve are glad to see that the fellow who it to establish his headquarters for-ist the Windward Passage has get his good work at &crea. Ye know that with him to the front the e is lound to go on.

We know that with him to the tront the war is lound to go on.

And every time we hear that mysterius sounds are heard from the direction of korea, something is using.

We can't heip feeling that with the windward Passage follow at the ticker there is something doing in the Eastern seed.

Leve is something doing in the Eastern Scat.

Everybody remembers how the mystellous soulds used to come from the Windwird Passags when Sampsons fleet was expected to get into toneh with Cerve-Tall and how it tent a thrill of joy to us to leave the way of the rent on the last call, never expecting that there would be a last call, so the two could fight and die for our country!

Now our good friend of the Windward Passags is doing his duty, and we may Keep inform dus of the actions of Administ Katsuna and Commodore LaPatenointz.

Mr. Carter Brander has mother scheme. While talking with him in the Commercial he unfold d himself.
"You see, it's this way," ne said, "when a hig fire breaks out anywhere, all you got to do is to get a de achment of the hir witzers ordered out, and home had been with the adjacent fire. If you knock down these buildings, then the fire is supposed in its onward career, and the fire is practically out.

"Fut you got to get a detachment of the Howitzers, Dynamite ain't no good." "Try it and see."

The very next time we get a chance we are going to try it, if Captain Myers don't object.

Now you take Miss Faller—she of "The Mish 'the La ed" Company. The recopic know what a good fellow some o her people are, but they find out after they appear in the show. Miss Fuller is one of those grand villajaresses that one just admics, even they as she does some things not according to Hoyle.

Good acting is what wa like, even in an adventuress.

But the story comes after the show.

an adventuress.
But the story comes after the show.
A fine villa.nness is all right, and that's
what Miss Fuller is, but after the show
is all over she is one of the finest that
ever came down the stages.
She is not half as bud as the play
makes her, ald we think we could trust
her, with our children.

## OF HUMAN INTEREST: STORIES OF TO-DAY

Something to be Thankful for. The thankful spirit finds occasion for ratifude for the smallest comforts. gratfude for the smallest commorties. Lippincott's Magazine tells this: A camp moeting was in progress in the wire grass region of Georgia. The afternoon service was conducted by Uncle Mose Bradford, an exhorter of deep piety, but Bradford, an exhorter of deep piety, but entirely innocent of book learning. He took for his text on this occas on the words of St. Paul: "For I have learned in whatsoever state I am therewith to be content." After talking about fifteen minutes on the beauty of contentment minutes on the beauty of contentment from a Christian's point of view, he suddenly announced that he was going to "throw the meeting open." He invitation was: "If you've got anything to be thankful for, git up and say so." One after another rose and spoke of peace and contentment under circumstances that seemed impossible tudged from a worldseemed impossible, judged from a worldseemed impossible, judged from a worldly standpoint. Some said they were
thankful for things they had missed,
and at last an old lady arose, pushed
back her sunbonnet, and, with a beaming countenance, triumphantly excla med:
"Well. Brother Mose, I hain't got but
two teeth, but, thank God, they hit!"

## Too Illiterate.

When the present Second Assistant Secretary of State, Alvey A. Adee, was third assistant, the writer was an em-ploye of the State Department, says the Philadelphia Post. Answering a ring of the telephone, the

"Will you kindly give me the name of the Third Assistant Secretary of State?"

"Adee."
"A. D. what?"
"A. A. Adee." "Spell it, plense."

But here the receiver was indignantly

## Japan's Bugs.

Among the natural curlosities of Japan are its singing insects. The most prized of these tiny musicians is a black beetle named "susumushi," which means "insect bell." The sound that it emits resembles that of a little silver bell of the sweetest and most del'ente tone

Where Kissing Is Barred. At Cheron, Russia, lovers have been forbidden to kiss in public. A kiss given in the street incurs a fine, and a lover who takes his sweetheart by the waist is fined, while the mere putting of a cross to signify a kiss on a post eard is also against the law. At Milan a kiss in public is punished by a fine.

Not That Jeff.

An Arkansawyer, when told the other day that the figure surmounting the Confederate monument in the capitol grounds is that of Jeff. Davis, said that Brounds is that of Jett. Davis, said that he came to Texas to get away from that man, and "by Jacks," he proposed to keep on to Mexico. The Arkansas Jeff. Dav's is of a different kidney.—Austin (Tex.) Statesman.

## FIRED AT WOLVES, BUT KILLED CHILD Bullet Ricochets and Strikes a

Sleeping Babe a Half Mile

Away.

(Special to The Times-Dispatch, GREELEYNCOL., Feb. 9.—An accident took place about five and a half miles west of this city, resulting in the death of the six-months old babe of Mr. A. Ease. Frank Williams, who tents a faith from A. Durkee, seeing three coyotes about a quarter of a mile distant from his house, fired a shot at them from a Savage rifle. The bullet struck the ground near where the wolves were, and it is supposed glanced, taking a curving course over a small hill which intervenes between the Durkee place and Eusse's home, a half mile away. The missile passed in at the window of the Russe residence, went through a feather pillow and through the head of the siceping infant on a cot close by, lodging in a pillow on the other side. The child died within a few minutes.

City Marshal Camp was summoned to the scene of the accident. Camp immediately began a search for the source of the bullet. Marshal Camp became convinced the missile had come from the direction in which Williams resided, and, or interrogating Williams, obtained a confession that at the precise time the west of this city, resulting in the death

child was shot he had fired at the coyotes.
It is not probable that an inquest will be held, as Williams does not deny firing the fatal shot.

DETECTIVES TO BE LINGUISTS

(Special to The Times-Dispatch.) ST. LOUIS, MO., Feb. 9.—Ability to speak several languages will be required of detectives who expect to do duty at the Fair Grounds next summer. This recommendation by Chief Desmond was approved by the police board lust night. About 500 additional men will be needed for the extra work, which the World's Fair will entail upon the police force, and steps were taken last night, to make the necessary arrangements.

It is not desired that the "fly cops" become deep literary experts in the several languages which will be spoken at the Fair, but it is thought they ought to be able to understand at least a little of several languages, so that the foreigners seeking directions or any ordinary information, may do so without too much at rouble. the Fair Grounds next summer, This rec-

## MORE ODD POWER IS GIVEN TO RADIUM Columbia Professor Thinks He

(Special to The Times-Dispatch.)
NEW YORK, Pob. 9.—the most marvelous exhibition of the strange power of radium-a machine that is perpetual in its action, theoretically-that ever was given, according to scientists, was presented at the New York Academy of Sciences by Professor George B. Pegram,

Sees Perpetual Motion

Hidden in It.

of Columbia University.

"I do not say this little instrument will run perpetually," explained the professor, but that it will run indefinitely, the time depending solely on the durability of the materials of which it is composed." posed."

All beheld a stender pendulum of gold swing back and forth at regular intervals of sixty seconds. The professor explained that the action was caused by the two known rays of radium—the positive and the negative—working upon the gold. One set of rays repelled the gold, while the other overcame the repulsion and attracted it.

gold touches the radium tube the wires cause a discharge of the adracting ray current and the pendulum swings back to its former position, and then is gradually drawn back again to the tube. "Professor Strutt first made this discovery," said Profesor Pegram, "but t e action of his machine was very slow, it only made the pendulum swing in twenty minutes," minutes." Professor Pegram used his interesting
